Scissor

Application Instructions

Important notes:

You won't be able to reposition your decal after the backing paper is removed, so plan carefully where you are going to put your wall art. Decals are not reusable so please take care when positioning. They can be easily removed but may become damaged in the process.

Before you begin it is important to unroll decal and lay on flat surface with application tape facing down and backing paper facing up. With application tool (or credit card) rub down on the backing paper. This insures decal is gripped by the application tape.

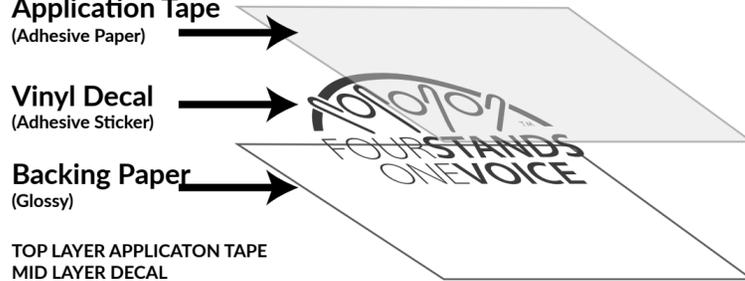

To remove heat with hair dryer on hot setting for 5 minute and slowly peel decal from the corner at a 45 degree angle.

Application Tape
(Adhesive Paper)

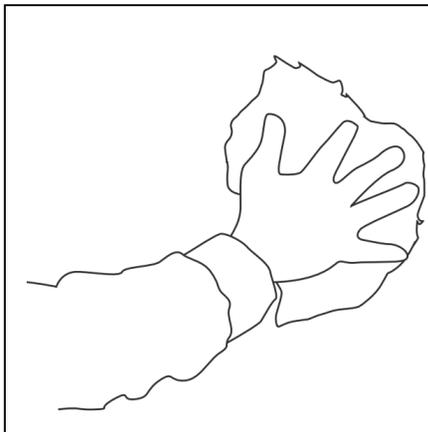

Vinyl Decal
(Adhesive Sticker)

Backing Paper
(Glossy)

TOP LAYER APPLICATION TAPE
MID LAYER DECAL
BOTTOM LAYER BACKING PAPER

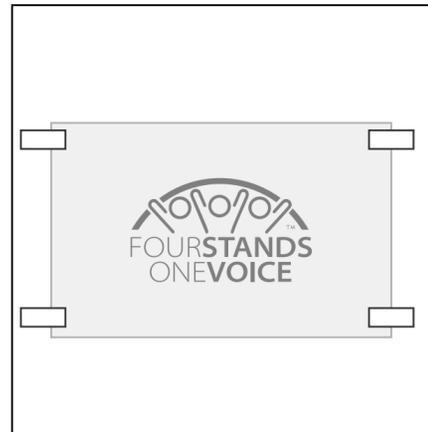

Step 1 Prepare the area

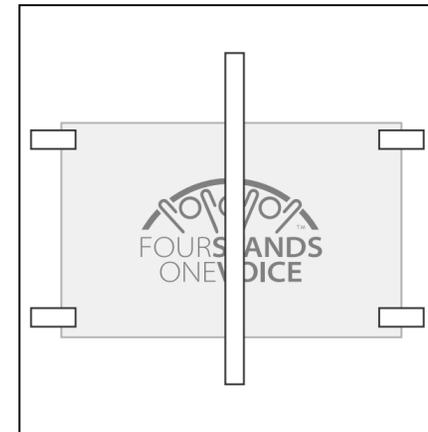

You need a clean, dry surface for your decal to stick. So give the area a wipe with a dry cloth. If you have recently painted you need to wait two weeks before applying your decal.

Step 2 Position your decal

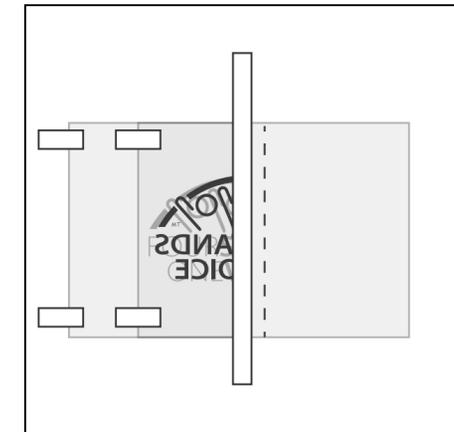

Before you apply your decal you need to position the graphic on the wall using masking tape on four corners ensuring it is level and you are happy with the position

Step 3 The Hinge

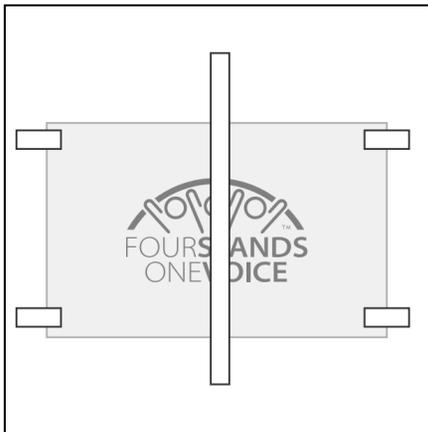

Once you are happy with the position, place a strip of masking tape across the centre of the decal to create a centre hinge.

Step 4 The Peel

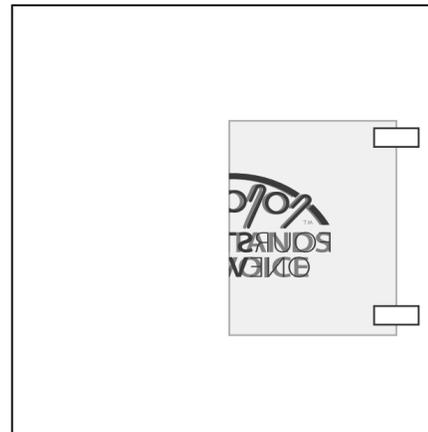

Fold one side of the decal back. Peel away the backing paper. If any letters remain stuck to backing paper, rub back down on the backing paper with your finger and try again. Then cut away the exposed backing paper.

Step 5 The sticking

Lower the decal to the wall and using the squeegee start pressing the graphic onto the wall, working from the middle outwards and keeping tension on the corners.

Step 6 Remove Hinge

Remove the masking tape hinge and peel away the remaining backing paper. Keeping tension on the corners press the graphic onto the wall repeating step 5.

Step 7 Remove application tape

Now the decal is stuck to the wall, wait 10 min. and carefully peel off the application paper. If sections of the graphic stick to the application paper you can push it back on the wall rub with finger and try again.

Step 8 The big reveal

When the tape is removed your decal is finished. Congratulations! Now take a picture and send it to us at Four Stands One Voice because it makes our day to see the finished product.
